

Cybersecurity Manager

Location: Remote or on-site (Europe)

About Ciloo

Ciloo is on a mission to disrupt how global enterprises manage internal eCommerce. Emphasizing sustainability, we help our customers cut transportation by up to 90% and production volumes by 50% for the products we offer. The platform combines environmentally-friendly practices with seamless integration into existing systems, making it the go-to choice for modern, globally-minded companies. We help our customers transition into a more user friendly and sustainable solution by offering a global one-stop eCommerce platform for all products used in marketing, sales, employer branding, corporate branding and much more. The platform boasts local, on-demand production in over 30 countries, significantly reducing shipping distances and volumes.

We have grown fast in the last 15 months and it is time to scale up the team.

Job Brief:

We are seeking a cybersecurity manager to assist us in developing security procedures, documentation, and protocols. You will be required to search, configure and implement security tools which will protect our remote workforce. You will be tasked to keep our staff up-to date with training to increase our awareness of attack vectors, such as social engineering and phishing. You will also need to respond to client questionnaires in regards to security questions and security architecture.

Responsibilities:

- Participate in the development and implementation of incident response and disaster recovery plans.
- Review current procedures and workflows and implement secure alternatives where needed.
- Monitor and analyze security alerts, incidents, and logs to identify and respond to potential security threats.
- Stay up-to-date with industry trends, emerging threats, and best practices in cybersecurity.
- Provide security awareness training to employees and promote a security-conscious culture.

Requirements

- Bachelor's degree in Computer Science, Information Technology, or related field.
- Proven experience as a Cybersecurity Manager or in a similar role.
- In-depth knowledge of cybersecurity principles, practices, and technologies.
- Familiarity with regulatory compliance standards (e.g., GDPR, HIPAA).
- Strong understanding of networking protocols and security architecture.

- Excellent problem-solving and communication skills.
- Ability to work collaboratively in a team environment.

Team

We are a small team of 15 people, and the team members are distributed across countries, including the Netherlands, the UK, Norway, Macedonia, Pakistan, Mexico, and Malta. We have an office in Rotterdam, Netherlands, but people can work fully remotely. Some work from home, some choose to work from a co-working place in their country, and some travel and work across the world.

If you are interested or if you have questions, please contact Thomas Sultana, Chief Technology Officer at Ciloo, thomas@ciloo.com
